SUMMARY

Computer Science student at BINUS University (Artificial Intelligence specialization, expected 2028), with team coursework projects across machine learning, computer vision, natural language processing and software engineering. Hands-on implementation experience in Flutter application development and in building and deploying a personal web project end to end. Seeking a 2027 internship in AI/ML or software engineering.

EDUCATION

BINUS University — Jakarta, Indonesia

Bachelor of Computer Science, Artificial Intelligence specialization · Sep 2024 – Expected 2028 · GPA 3.32 / 4.00

Selected Coursework: Machine Learning, Deep Learning, Artificial Intelligence, Natural Language Processing, Computer Vision

SELECTED PROJECTS

Save_n_Serve — Flutter Mobile Application · 2026

University team project · My scope: frontend implementation (Flutter, Dart, MVC, ChangeNotifier) · [GitHub](#) · Kian76-IT/Save_n_Serve

- Implemented watchlist add, delete and quantity controls with a real-time total price, synchronized across screens through a ChangeNotifier-based FoodController.
- Built watchlist routing, donation detail and empty-state flows, and refined the profile page from the team's Figma design.

Personal Portfolio Website — HTML, CSS, JavaScript (no framework) · 2026

Individual project, built end to end · [GitHub](#) · nichsalim/nichsalim.github.io

- Built a single-file bilingual (English / Indonesian) portfolio with a responsive layout, light and dark theming, an interactive hero, image lightbox and accessible interaction patterns, in hand-written HTML, CSS and JavaScript.
- Verified the interface with automated browser tests across viewport sizes, languages, themes and reduced-motion settings, and deployed it on GitHub Pages.

Semantic CV Analyzer — Résumé-to-Role Matching (NLP) · 2026

University team project · My scope: concept, dataset research, documentation · [GitHub](#) · lewron135/Semantic_CV_Analyzer

- Proposed the project concept and helped identify the dataset the team used for its spaCy and Sentence-BERT pipeline.
- Wrote the project report and prepared the presentation, including the method's stated limitations.

Career Prediction — Multi-Class Classification (Machine Learning) · 2026

University team project · My scope: project idea, dataset research, documentation ·

[GitHub](#) · Ganeshu15/Career-Prediction-Machine-Learning-Project

- Initiated the project idea and helped identify the dataset the team used for its scikit-learn classification models.
- Reviewed gaps in project scope and produced the report, presentation and application demo video.

SKILLS

Programming Languages: Python, Java, C/C++, JavaScript, HTML/CSS, SQL, Dart

Libraries & Frameworks (Coursework Projects): scikit-learn, pandas, NumPy, spaCy, Sentence-BERT, YOLO

Tools: Git/GitHub, VS Code, Jupyter Notebook, Streamlit, Flutter, Figma

Areas: Machine Learning, Computer Vision, Natural Language Processing, Software Engineering

Spoken Languages: Indonesian, English

EXPERIENCE

Sales Staff — League store, Pekan Raya Jakarta · June – July 2024

- Explained footwear products, sizes, pricing, quality and promotions, and recommended options to fit customer budgets.
- Supported booth setup, product display and closing alongside a booth team of roughly 13–15 people, working to sales targets.

Ticketing Committee — Universe in Hymns, school music performance · March 2024

- Managed ticket registration, seating allocation, seat classes and numbering, payments and Google Form registration.
- Directed attendees to their seats on event day and independently ran a packaged-snack booth during the concert.

Administration Helper — Family business, gas sector · 2021 – 2024

- Entered and maintained gas-cylinder records in Accurate, covering incoming and outgoing delivery documents and code matching.
- Recorded transactions and assisted with invoice processing while learning administrative operations under supervision.

Public Relations Staff — Student Council (OSIS), high school · 2022 – 2023

- Coordinated student communication and supported school activities, including class meetings after midterm and final exams.

TRAINING & CERTIFICATES

Microsoft Elevate AI Training Session — Azure AI Fundamentals

GreatNusa (Bina Nusantara) · co-signed by Microsoft Indonesia · 15 hours · March 2026

Completed "Pelatihan Azure AI Fundamentals: Microsoft AI-900T00-A Belajar AI dari Dasar" with a demonstration of learning.

English C2.2-Level — Market Research & Business Communication (V2)

Beelingua, BINUS University · CEFR C2.2, passing grade · November 2025
